VANAPALLI JAGADISH KUMAR

Cloud Engineer | AWS Landing Zone & Infrastructure Automation Specialist
Vijayawada, Andhra Pradesh, India | +91 7702759769 | jagadishvanapalli05@gmail.com

PROFESSIONAL SUMMARY

Cloud Engineer specializing in AWS Landing Zone architecture, Account Factory for Terraform (AFT), and infrastructure security automation. Currently leading multi-environment account provisioning and cross-region cloud migration (Bahrain to Ireland) with centralized logging, audit, and governance controls. Skilled in Terraform, AWS Control Tower, CI/CD pipeline security, and core AWS services including IAM, EC2, S3, VPC, CloudTrail, and GuardDuty. AWS Certified Cloud Practitioner.

CORE SKILLS

- Cloud Platforms: AWS (IAM, EC2, S3, VPC, CloudTrail, GuardDuty, AWS Config, Organizations, Control Tower)
- Infrastructure as Code: Terraform, AWS Account Factory for Terraform (AFT)
- CI/CD & Security: GitHub Actions
- Programming & Scripting: Python, SQL, Core Java, JavaScript
- Cloud Networking & Governance: Transit Gateway, Multi-Account Architecture, SCPs, IAM Least Privilege, Centralized Logging
- Web Technologies: React JS, Bootstrap
- Tools: Git, GitHub, AI/ML Fundamentals
- Certifications: AWS Certified Cloud Practitioner

PROFESSIONAL EXPERIENCE

Engineer – Script Programming | Tata Consultancy Services (TCS) | *May 2025 – Present*

- Leading AWS Landing Zone migration for a Saudi Arabia-based client, transitioning existing cloud infrastructure from the Bahrain region to the Ireland region.
- Architecting a multi-environment account structure (Development, Test, Production, UAT) with centralized logging routed to dedicated Log Archive and Audit accounts, and governance managed through a dedicated Security account.
- Automating AWS account provisioning using Account Factory for Terraform (AFT), standardizing security, networking, and logging baselines across all environments.
- Integrating automated security checks into CI/CD pipelines to enforce secure code deployment practices.
- Securing AWS services (IAM, EC2, S3, VPC, CloudTrail) through continuous security assessments, proactive analysis, and remediation, ensuring compliance with organizational and industry best practices.
- Reducing manual operational effort through scripting and automation, while documenting security findings and remediation steps for audit and knowledge-sharing purposes.

KEY PROJECTS

Enterprise AWS Multi-Account Landing Zone & AFT Automation

AWS | Terraform | GitHub Actions | Control Tower | AFT | Transit Gateway | IAM | CloudTrail | AWS Config | GuardDuty

- Designed and implemented a multi-account AWS Landing Zone using AWS Organizations, Organizational Units (OUs), and Control Tower for centralized governance.
- Built reusable Terraform modules provisioning Dev/Test/Prod VPCs, subnets, routing, IAM, security, and logging with environment-specific configurations.
- Implemented AWS Transit Gateway connectivity with route-table-based environment isolation, enabling controlled cross-environment communication.
- Established security controls using Service Control Policies (SCPs), least-privilege IAM, CloudTrail, AWS Config, GuardDuty, Security Hub, and mandatory resource tagging.
- Developed GitHub Actions CI/CD pipelines for Terraform validation, planning, and automated security scanning.

- Automated standardized account provisioning via AFT, embedding security, IAM, logging, and networking baselines.

Legal Document Simplification for Non-Experts

Python | Streamlit | NLP | Hugging Face Transformers | OCR

- Built a legal document simplification system converting complex legal text into plain language using a T5 transformer model.
- Integrated OCR to extract text from scanned legal documents, PDFs, and image files.
- Added Telugu-language support via translation-based processing for regional accessibility.
- Developed clause detection to identify key legal sections including liability, termination, confidentiality, and intellectual property terms.

CERTIFICATIONS

- AWS Certified Cloud Practitioner — Foundational knowledge of AWS cloud services, security, pricing, and architecture.

Credential: https://www.credly.com/badges/18df563a-cd4b-40d3-9820-e920c38ea9d7/public_url

EDUCATION

Master of Computer Applications (MCA) — Potti Sriramulu Chalavadi Mallikharjuna Rao Engineering College *(Sep 2024 – Aug 2026)*
Bachelor of Computer Applications (BCA) — Kakaraparti Bhavanarayana College, Vijayawada *(Oct 2021 – May 2024)*
Intermediate (MPC) — Sri Chaitanya Junior College, Vijayawada *(June 2019 – May 2021)*

ACHIEVEMENTS

- 1st Prize, STUDWEBER Competition — TECHSPARKS-2K23, State-Level Technical Event, Department of Computer Science (November 2023)
